CONSEC Original DRY Wall Sawing System

CONSEC Original DRY Wall Sawing System is an innovative DRY wall sawing system. It is consisted of Electric Wall Cutter CDW-40AE, Dry type Feed-Water Regulator, Cyclone Dust Collector and Main Dust Collector.

Dedicated diamond blade is used sound deadening material, so a reinforced concrete can be cut silently.

Features

- 1** CONSEC Original DRY Wall Sawing System make it possible to drill for reinforced concrete without water. So slurry water isn't generated.
- 2** Dedicated diamond blade is used for the sound deadening material, so it can minimize the cutting noise, in particular dry cutting noise.
- 3** Back side of work material is covered by dedicated sponge cover, and directly collected concrete dust by dust collector. So work field can always be kept clean and minimize the clean process at work field (Patent is acquired)
